Brand Identity Guideline

Introduction

This document summarizes the fundamental technical characteristics of the Jeddah Airports logo.

It serves as a strict guide for the correct use and reproduction of the logo across all applications.

Logotype

Our logotype

This is our new logo. It's our signature and company guarantee. It's the graphic encapsulation of our values and it identifies everything that represents us: all we do and say.

To guarantee its correct application, always use the provided artworks.

Clear space

To preserve its legibility always respect the clear space around the logo as shown on the side.

Never place any other element, whether text, images or other logos in this area.

Color combinations

To ensure contrast and the correct use of color, apply the logo as shown on the side.

The black & white version should only be used when the main version cannot be applied for technical or production reasons.

Minimum size
To preserve legibility, always respect the minimum size show here.

Medium blue on white

White on medium blue

Black & white

Medium blue on light blue

White on dark blue

Application matrix

This matrix will help us manage and choose the right version of our logo according to the background color.

	Medium blue	White
White	مطارات جدة jeddah airports	✕
Light blue	مطارات جدة jeddah airports	✕
Medium blue	✕	مطارات جدة jeddah airports
Dark blue	✕	مطارات جدة jeddah airports
Black	✕	مطارات جدة jeddah airports
Dark photo	✕	مطارات جدة jeddah airports
Light photo	مطارات جدة jeddah airports	✕

Dont's

Maintaining and implementing the defined visual norms will ensure proper identification of our brand.

Any variation of our logo not included in these guidelines is not allowed.

These rules apply to both for the english version and the arabic versions.

Do not use the logotype in other colors.

Do not apply shades or other effects to the logotype.

Do not modify, rotate or distort the logotype.

Do not modify the elements that form the logotype.

Do not change the proportion of any of the logotype’s elements.

Do not edit the existing distance among the different elements of the logotype.

Do not use line versions of our logotype.

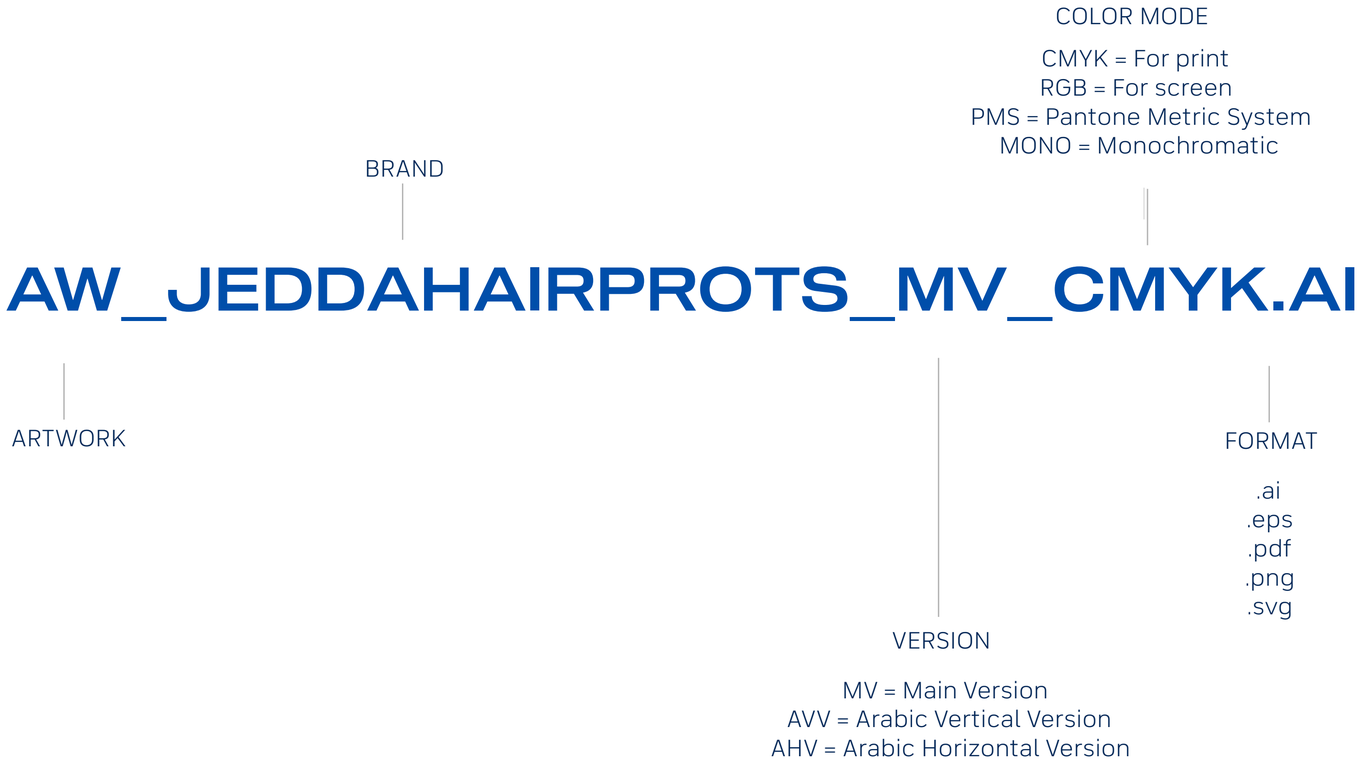

Do not use our logotype over photographs if there is no legibility.

Artwork naming system

For correct application of our logotypes, it is essential to use the correct digital file.

For that reason, an artwork naming system has been developed to organize our logotype artwork. In this way, it will be easier to find and select the correct file depending on the type of format or support it will be used for.
